

In the Claims:

Please cancel claims 2 and 6-7 without a disclaimer and a prejudice to and amend claims 1 and 3 as follows.

Sub
po

1. (Amended) A liquid crystal display, comprising:

a first panel [and a second panels spaced apart from each other and] having a first electrode and a second electrode[, respectively,] that are separated from each other and [which] generate electric field by applying voltage;

a second panel spaced apart from said first panel;

a liquid crystal layer interposed between said [the] first panel and said [the] second panel[s], wherein liquid crystal molecules are aligned substantially parallel to said first panel and said second panel; and

a plurality of spacers dispersed in the liquid crystal layer,

wherein the spacers align liquid crystal molecules near the spacers in a substantially regular manner with respect to surfaces of the spacers.

A2

3. (Amended) The liquid crystal display of claim 1 [2], further comprising a pair of polarizers attached to the outer surfaces of the first and the second panels, wherein polarizing directions of the polarizers are substantially perpendicular to each other.
